

## September 2022 Overview

Bentleys Wealth's model portfolios are a suite of real return, multi-asset class, multi-manager portfolios across four risk/return profiles. The portfolios are actively managed through our dynamic asset allocation and investment manager selection processes.

We dynamically adjust the portfolios' allocations to achieve a high probability of meeting or exceeding the required return objectives while maintaining the stated risk profiles. The mix of asset classes and strategies in the portfolios will vary through time depending on our forward-looking estimates of market risk and return. Our style is active value management with quantitative foundations and qualitative decision-making.
